

1) Add perms to skills.json

```
skill.json – hello-world-demo
skill-package > {} skill.json > {} manifest > [ ] permissions > {} 0 > name
1   {
2     "manifest": {
3       "permissions": [
4         {
5           "name": "alexa::devices:all:notifications:write"
6         }
7       ],
8       "publishingInformation": {
9         "locales": {
10           "en-US": {
11             "summary": "Sample Short Description",
12             "examplePhrases": [
13               "Alexa open hello world",
14               "hello",
15               "help"
16             ],
17             "name": "hello-world-demo",
18             "description": "Sample Full Description"
19           }
20         },
21         "isAvailableWorldwide": true,
22         "testingInstructions": "Sample Testing Instructions.",
23         "category": "KNOWLEDGE_AND_TRIVIA",
24         "distributionCountries": []
25       },
26       "apis": {
27         "custom": {
28           "endpoint": {
29             "uri": "ai██████████unction:ask-hello-world-de"
30           }
31         }
32       },
33       "manifestVersion": "1.0"
34     }
35 }
```

A request has failed. See the output for more information. [Go to output](#)

<https://ask-skill-enabler.amazon.com/> to enable the skill <- perms required
You may have this ability as the developer in the portal

Create topic definition

Folder structure and naming convention are important here use this example below

Re-deploy the skill and wait a few minutes for the skill to appear on line

```
1  {
2      "topic": {
3          "topicId": "HelloWorld.TestTopic",
4          "view": {
5              "parameters": {
6                  "en-US": {
7                      "title": "Topic Title",
8                      "description": "This is a topic description"
9                  },
10                 "en": {
11                     "title": "Topic Title",
12                     "description": "This is a topic description"
13                 },
14                 "und": {
15                     "title": "Topic Title",
16                     "description": "This is a topic description"
17                 }
18             }
19         }
20     }
21 }
```

Grant your skill notification permission

Request temporary credential use this^ password to do so

The use curl or the API to request temp credentials

```

Enable SKILL
The skill has been enabled.

> curl -k -X POST -H 'Content-Type: application/x-www-form-urlencoded' \
-d 'grant_type=client_credentials&client_secret=amzn1.oa2-cs.v1.7896b214466fe39
&client_id=amzn1.application-oa2-client.3c9d47a62b3f482caf46eaa5816e07bf&scope=
alexa::devices:all:notifications:write' \
https://api.amazon.com/auth/o2/token | jq
% Total    % Received % Xferd  Average Speed   Time     Time     Time  Current
          Dload  Upload   Total   Spent   Left  Speed

  "scope": "alexa::devices:all:notifications:write",
  "token_type": "bearer",
  "expires_in": 3600
}
~/hello-world-demo/hello-world-demo 18.0.0 at 02:16:00

```

Use CURL to now create a notification with temp credentials and notification payload.

POST Notification

```
